About This Game

9Dragons is a free to play, 3D MMORPG with fluid martial arts combat, lush environments, and intense PvP. Immerse yourself in a mesmerizing world set in ancient China at the beginning of martial arts chivalry. Choose your destiny by siding with the "White" or "Black" clans and devote yourself to becoming a true martial artist.

Background

In an ancient time in China, the nine heroes (each was dubbed as Dragon), leading one's respective clan, competed to become the One. Through numerous battles and wars, they competed. However, there was one event that drove everyone to doom, the War of Nine-Dragons. Some speculated that there were love-hate relationships among nine clans and their leaders. However, no one was able to provide the real answer that triggered such a tragic event, which caused all of nine clans to disappear from the land.

Many years passed by, six clans which suffered relatively less from the War than others, resurfaced. And so, our story of Nine Dragons begins...

Title: 9Dragons
Genre: Free to Play, Massively Multiplayer, RPG
Developer:
JoongWon Games
Publisher:
RedFox Games
Release Date: 14 Feb, 2017

b4d347fde0

The most obnoxiously racist game I've played in a while.. **PROS:**

- + Fairly nice 2D artwork, reminiscent of the Amiga versions of Cinemaware titles from the 1980s and 1990s.
- + Simple interface and controls.
- + Extremely inexpensive.
- + Could be run on any system.

CONS:

- No options menu. There's a sound icon (in the shape of a trumpet) in the lower right-hand corner, but that only gives you the choice to turn on or off ALL sound.
- Can't save your game. There are no manual saves, quicksaves, autosaves, checkpoint saves or save points. If you need to leave for any reason, expect to start over the from the beginning.
- Interface is simplistic to a fault. There are two sliders and four icons to push. That's it.
- The instructions and objectives you're given in-game are shown once and you can't ever see them again.
- Virtually no gameplay to speak of. At best, you'll adjust one or both sliders and maybe click one or two of the buttons each turn.
- Text is center-aligned (a huge mistake itself) and appears almost jumbled.
- The English translation is absolutely abysmal. Broken sentence structure, poor spelling, haphazard grammar, and completely incorrect words are used all over the place. For instance, the icon to move ahead to the next day is labeled "next stroke." The word "stroke" can mean a number of things in English, ranging from a medical condition to various physical actions, but it certainly doesn't mean "move ahead to the next day."
- Even the achievements are lazily created: some are just letters (no, seriously, that's it) while others show misspelled or nonsensical titles, such as "qwest" or "casarm."
- No Steam Cloud, but then again, that's not a surprise. The game needs to save something for Steam Cloud to be of any use.

VERDICT: World of Feudal (a game title that makes little sense in its own right) is, quite honestly, a horrendous game and should never be bought by anyone. I'd refund WoF if the price weren't less than a cup of coffee.. - While the game uses a standard game engine (RPG Maker), it uses a unique interface, rewriting most parts.

- The story is interesting and not too predictable (you can imagine some parts ahead of time, but not everything).
- The characters are quite unique.
- has a great replay value

- Although the spelling and wording isn't perfect and the game still has some bugs they are patched extremely fast. This soundtrack is suspenseful and beautiful!

I HIGHLY recommend this soundtrack!

Don't forget to check out the game as well!. Best LSD trip without illegal substances. Plus for animated visuals in time with your own choice of music.

Ah, ♥♥♥♥ it, it's simply the best game, ever.. I like it, it comes with a nice assortment of equipment. My one gripe is that the outfit and the tackle bag, and rod bag still take wear. I haven't had one long enough to know but that kind of sucks if you eventually lose the outfit because it wears and bags because they wear out? I feel like those should at least be forever since you paid for them Can you fix them, i know you can with rods etc. Anyway, i have enjoyed using the stuff in the pack.. Starting the game, you will go into an area with no plot. Just you standing there, 'corpsewalkers' swinging at you. Then jarring popups tell you basic controls then guide you to a town across a bridge. The graphics are not that great, the interface is a mishmashed diablo, and quite honestly I had no idea what was going on. Play this on a bet, while drunk, or when you need to feel confused.

You can't even alt+f4 out of it.

Pros: Honestly cannot think of any. There are many more games out there that are dungeon splunks that do this better, for cheaper.

Cons: Too many to list.. Pretty game, but short and easy. (My total hours are inflated because I kept forgetting to exit the game and left it running while not playing it.) Good choice if you like hidden object games, but only recommended if on sale and bought in a bundle with the other Samantha Swift game.

Rating: 3/5.

- temporarily sates addiction to 2D sandbox games
- more casual than Terraria
- a decent (but not great) mobile port

I'm grabbed into this game. I'm expecting the developer never stop creating this kind of gems.. This game surprised me tremendously, it looked interesting enough to buy and try it, but the outcome was much more then for what I was hoping for. It's a system that works, try it out yourself if you like strategy games...

Protect your King!
Feed your army!
Crush your opponent!

+ Realtime strategy in a platformer setting
+ Learning Curve Medium\Hard

-- No complaints about graphics, sounds, music --

- I didn't liked the flag system, to direct your troops, it partially works, but when you want to send them somewhere else, for me I had to do it one soldier by one soldier... Maybe it works like a charm and I didn't found the way how to do it...

It's almost like that Fallout Shelter game but then with Molerats! And maybe Dungeon Keeper, but in a platformer setting. I always liked that concept and here is another one of those.

. I always liked the idea of a FMV-based adventure. even back when this started, in the mid 90's. but let's be honest, most of them are garbage. Missing is actually pretty good. Both FMV and the adventure part are solid. it's an enjoyable experience. I am looking forward to the next episode (and I hope it doesn't take them too long).

The only negative thing I can say about it is, that there is not enough dialog. Most of the time no one is speaking. The protagonist could have been a little more chatty. For instance, when he hears his daughter on the speaker saying "Daddy, I miss you" - why doesn't he whisper something like "I miss you too, sweetie". All he does is shouting "no" at times. The scenes with the detective are better in that regard, but very short.

Well, it's only the first episode. So let's just see what comes next. If they keep this level or even improve, I feel I got my money's worth.

By the way, if anyone wonders how long the game is - it took me exactly 40 minutes.. Project Rhombus is a great game that syncs music to the beat. I never got bored of it out of my 5 hours of playing it and it is because the game is super addictive. ANd the more you play the more enjoyable it gets because you can play with the whole song and not lose. I have gotten 60.01 seconds on Hard mode and unlocked expert mode. I cried when I played expert mode because it is so fantastic. It stunned me. I also was able to react faster than I thought possible. The game also has enough settings to change to your need from having a solid background to changing the SFX and Music seperatly. This game is the most fun you can have with headphones or even without, and it is worth your time.

I loved this game and will continue to love it. And I think you will to.. Game isn't bad, it's actually has potential.

Controls are ok, combat is good and it's fun.

The problem is it's basically dead. However, you can play Solo or co-op with 2 friends.

Overall: 6.5/10 It's free, give it a try.. the \u2665\u2665\u2665\u2665 did i just buy...
